EarCheck® 3 Monitor

EarCheck® 3 provides a quick and painless way to detect middle ear fluid. Designed for patients ages 6 months to young adult. Simply place the tip of the EarCheck® 3 into the child's outer ear canal and press the SCAN button; the monitor sends a pleasant chirping sound into the ear canal. Some of this sound bounces off the eardrum and travels back to the instrument's built-in processor. EarCheck® 3 then analyzes the reflected sound to determine if there is fluid in the middle ear. Fluid presence is represented on a 1–5 color scale on an easy to read display, where level 1 (green) indicates "Fluid Unlikely" and where levels 3–5 (red) indicate a high likelihood of fluid. No calibration is necessary. Cleaning the tip can be done with alcohol wipes. Requires 2 "AA" batteries (not included). Latex-free.
